

Amendments to the Claims:

Claims 7, 9-11, 13-19, and 27-31 are currently pending. Claims 7, 11, 27, and 33 have been amended. Claims 1-6, 8, 12, 20-26, 32, and 34-37 without prejudice. This listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

1.-6. (canceled)

7. (Currently Amended) A method of using a remote control multimedia content listing system, said method comprising the steps of:

entering a media record into an electronic system of a remote control device, wherein said electronic system of said remote control device is web enabled and is capable of controlling one or more electronic devices;

storing said media record within said electronic system of said remote control device;

repeating the entering and the storing steps for additional media records;

uploading said media record from the electronic system of said remote control device via a wireless network connection to a network;

transferring said media record from the network to a network-control station;

determining in said network-control station an identity of media that corresponds with each said media record;

generating in said network-control station a configuration data for said electronic system of said remote control device that allows said electronic system of said remote control device to display a media guide, and wherein said configuration data determines a set of control signals that are configured to be transmitted by said electronic system of said remote control device to at least one electronic device based upon a media selection for activating said media selection;

transferring said configuration data from said network-control station to said network;

transferring said configuration data from said network wirelessly to the electronic system of said remote control device;

generating in the remote control an updated media guide based on the configuration data generated in the network-control station and received from the network;

displaying on a display of the remote control the updated media guide for user selection of a piece of media for play by one or more of the electronic devices;

automatically updating said configuration data if new configuration data is available; and

automatically transferring said updated-configuration data to said electronic system of said remote control device if said electronic system is operatively coupled to said network-control station; and

the electronic system of the remote control device issuing an audible warning for an upcoming media presentation associated with the media record.

8. (Canceled)

9. (Previously Presented) The method of using a remote control multimedia content listing system of Claim 7, including the step of: storing said configuration data within said electronic system of said remote control device.

10. (Previously Presented) The method of using a remote control multimedia content listing system of Claim 9, including the step of: displaying said media guide upon said a display of said remote control device.

11. (Previously Presented) A method of using a remote control multimedia content listing system, said method comprising the steps of:
accessing a web page of a control station;
inputting media data into said web page; and
generating a configuration data for said media data for an electronic system of a remote control device that allows said electronic system to display a media guide, for said media

data, wherein said electronic system of said remote control device is configured to control one or more electronic devices;

transferring said configuration data from said control station through a network and a wireless network link to said electronic system of said remote control device;

said configuration data determining a set of control signals that are transmitted by said electronic system of said remote control device to at least one electronic device based upon a media selection for activating said media selection;

automatically updating said configuration data if new configuration data is available; and

automatically transferring said updated-configuration data to said electronic system of said remote control device if said electronic system is operatively coupled to said control station;

generating in the remote control an updated media guide based on the configuration data generated in the network-control station and received from the network; and

displaying on a display of the remote control the updated media guide for user selection of a piece of media for play by one or more of the electronic devices; and

the electronic system of the remote control device issuing an audible warning for an upcoming presentation of a media presentation associated with the media guide or the updated media guide.

12. (Canceled)

13. (Previously Presented) The method of using a remote control multimedia content listing system of Claim 11, including the step of: storing said configuration data within said electronic system of said remote control device.

14. (Previously Presented) The method of using a remote control multimedia content listing system of Claim 13, including the step of: displaying said media guide upon said display.

15. (Original) The method of using a remote control multimedia content listing system of Claim 11, wherein said media guide includes a television guide.

16. (Original) The method of using a remote control multimedia content listing system of Claim 11, wherein said media guide includes a music guide.

17. (Original) The method of using a remote control multimedia content listing system of Claim 16, wherein said music guide is comprised of information relating to music media contained within a user's home stereo system.

18. (Original) The method of using a remote control multimedia content listing system of Claim 16, wherein said music guide is comprised of information relating to compact discs contained within a user's home stereo system.

19. (Previously Presented) The method of using a remote control multimedia content listing system of Claim 18, including the steps of:

selecting a media event to be displayed or listened to by said user;
transmitting a control signal to an electronic device to play said media event.

20 - 26. (Canceled)

27. (Currently Amended) The method of claim [[26]] 7, wherein the media presentation is a television program.

28. (Previously Presented) The method of claim 27, wherein the step of entering a media record into the electronic system of the remote control device includes a user entering the media record into the electronic system of the remote control device using at least one of a keypad, a mouse, a trackball, a keyboard, and a jog switch.

29. (Previously Presented) The method of claim 7, wherein the mouse, the trackball, the keyboard, and the jog switch are configured to control a pointer displayed on a screen of the electronic device.

30. (Previously Presented) The method of claim 7, wherein the electronic system of the remote control device is web enabled, and wherein the step of uploading includes uploading the media record from the electronic system of the remote control device to a network operatively coupled to the control station.

31. (Previously Presented) The method of claim 30, wherein the electronic system of the remote control device is a remote control.

32. (Canceled)

33. (Currently Amended) The method of claim ~~[[32]]~~ 11, wherein the media presentation is a television program.

34 - 37. (Canceled)
